

Communication Policy

It is important to remember the sensitivity of events taking place and control the information being released to the media, public, and others.

In the event of an incident, the designated lead for all external and internal communication will be the MFRA President who will represent the association with any statements released. The MFRA President will be the ONLY person to speak to any form of media, public, or other, unless someone otherwise has been designated by the President to take this lead. All other MFRA members are instructed not to comment to anyone other than fellow members. Comments made should be minimal, without assumption, and from known facts.
